SUMMARY

Web developer enthusiastic about making life better for customers through effective software design

SKILLS

- Databases: SQL Server, MongoDB, Oracle
- Servers: NodeJS, ASP.NET, C#, VB.NET, PHP, REST APIs, oauth, OIDC
- UI: React, React Native, Angular, Aurelia, Razor, KnockoutJS, JQuery
- DevOps tools: VS Code, Visual Studio, Git, T4, Cucumber, Jasmine, Mocha, Postman, Fiddler, Cypress, Azure DevOps
- Methodologies: Agile, Scrum, Kanban
- Collaborating with business, product, and UX teams to come up with the best solutions for customers.

EXPERIENCE

Senior Software Engineer / Solera Health Inc. - Phoenix, AZ *04/2017 - Current*

- Recognized as key contributor and one of the top developers in the company.
- Led team developing new platform on MERN stack (Mongo, Express, React, NodeJS) with a mobile-first UI and highly configurable back-end.
- Led platform integration effort working with multiple third-party partners to integrate a single-sign on experience with real-time API web hooks to support performance-based milestone calculation.
- Built prototype native mobile app using react native and generating web-based interface using react-native-web.
- Started and led automated testing working group encouraging developers to write more automated tests and socializing/developing related tools.
- Automated delimited file based data processing system using Azure SQL and C#.
- Built replication system that synchronized Salesforce objects into Azure SQL in near real-time.
- Converted multiple processes from Access and Salesforce into Azure LogicApps, Azure AppService, and Azure SQL.

Principal Software Engineer / Sphera Solutions (divested by IHS) - Tempe, AZ *01/2013 - 04/2017*

- Built reusable architecture leveraging code generation with a SPA UI and Web API services.
- Led design and development of self-service reporting module.
- Led scrum team providing core architecture and tools support for integration platform.
- Recognized as top performer in solving software issues, building quality into code, leading process improvements, and overall efficiency.

Senior Software Engineer / IHS (acquired ESS) - Tempe, AZ *01/2011 - 01/2013*

- Built single sign-on and RESTful web services layer for enterprise platform.
- Managed the migration from TFS 2008 to TFS 2010/2012 with automated build-test-deploy.

Software Engineer / ESS - Tempe, AZ *01/2007 - 01/2011*

- Developed ETL and dashboard solution for business intelligence module.
- Engineered C# version of complex calculator originally built as Oracle/SQL stored procedures.
- Developed customizable rule engine and Silverlight-based log report for integration product.
- Integrated metadata tool with custom installer to reduce dependence on database scripts.

Applications Developer / Center for Arizona Policy - Scottsdale, AZ *01/2006 - 01/2007*

- Built ad-hoc query tool for donor database using VB.NET, ASP.NET, SQL and AJAX.NET.
- Built interactive online voter's guide using PHP, Javascript, and cookies.

Software Developer / Alpha Omega Publications - Chandler, AZ *01/2000 - 01/2005*

- Developed and managed corporate website using a variety of web based technologies including ASP, Javascript, HTML, CSS, and Visual Basic.
- Developed Windows desktop-based curriculum delivery application in Windows Forms with VB.NET.
- Developed authoring tool for curriculum designers.

EDUCATION AND TRAINING

Western Governors University *2014*
Bachelor of Science: IT - Software

Patrick Henry College *2007*
Bachelor of Arts: Government - Public Policy

CERTIFICATIONS

Microsoft Certified Solutions Developer: Web Applications
May 29, 2015
